T-Passive Slim  
- COLOR: woodc turner oak malt

The low combination of the frame and sash, as well as the narrow floating mullion with centrally placed handle, provide a larger glazing area and thus more daylight in the room

Invisible weld and slender, rounded profiles are a symbol of timeless design.

## T-Passive Slim - slimline windows, to fill your home with light

Open up to daylight with T-Passive Slim windows. Thanks to the slim design and low combination of the frame and sash, T-Passive Slim windows will let up to **27% more light** into your home! The extra light in the room helps reduce energy consumption, which saves your money and has a positive effect on the environment.

### Titanium Technology - windows that last longer than others

Profiles of T-Passive Slim windows are manufactured using the modern Titanium Technology, in which we use full-grade PVC with titanium oxide. Thanks to the application of this technology the T-Passive Slim windows are characterised by high rigidity, high resistance to discolouration and harmful effects of sunlight.

### Patented third gasket system with a clip to seal the window

Budvar windows are the only windows on the market with a two-component MD system, which consists of a third gasket and a special clip mounted in the frame. This solution significantly improves the thermal, acoustic and even the security of the window - the clip provides additional anti-burglary protection, making it impossible to move the fitting from the outside. What is important, the decision of installation of the third gasket with a dedicated clip can be made at any time during the use of the window, without having to disassemble it.

T-Passive Slim - color: black smooth, central handle Standard color: silver F1

## Ecology

T-Passive Slim windows are certified to be free of admixtures of lead, cadmium and other heavy metal compounds. By choosing our windows you can be sure, that you contribute to the world around us not being poisoned by these harmful substances.

## Original design

- ▮ **21 colors to choose from**
